

Sankara Rao Kalidasu

Lead Product Designer / Design Systems Architect · Enterprise UX · Accessibility · Scalable Platforms

17+ years designing enterprise-scale digital products in healthcare, logistics and B2C. Specializes in design system architecture, accessibility-first UI and simplifying complex regulated workflows into intuitive experiences. Proven track record leading cross-functional product teams and modernizing legacy platforms into scalable UX ecosystems.

PORTFOLIO
www.spaykmedia.com/profile/ux.html

EXPERTISE

Figma, Sketch, Axure, AdobeXD, InVision, HTML, CSS, SCSS, JS, MDX, React, GitHub, Agile, Scrum, Jira, Atlassian, Framr, Adobe Suite, Principle, Figjam After Effects, 3D, Storybook, Photoshop, Illustrator, Voice Over, Miro, Token Studio, FigJam&Make, Cursor, Workday, Claude, AI prototyping.

SKILLS

Information Architecture, Critical Thinking, UX Vision, Product Design, Ideation, Collaboration, React & Web Components, Design Systems, Accessibility, Rapid Prototyping, Animations, Mentoring, WCAG 2.2, 508, Usability Testing, Inclusive Design, UCD, Visual Design Design Thinking, AI-powered design workflows.

EDUCATION

Bachelor of Science
Andhra University

Diploma - Motion & Visual Design
YES School of Design

Diploma - Computer Graphics

HIGHLIGHTS

- Exceptionally creative: Balancing Human Computer Interaction principles, design ambition and real-world technical constraints at enterprise scale.
- Led cross-functional teams of 10-12 across product, engineering, compliance and accessibility.
- Modernized a 20+ product portal using a CSS-injection, enabling large-scale UX improvements without a full engineering rebuild, saving hundreds of hours.
- Accessibility advocate: WCAG 2.2, Section 508, VoiceOver, NVDA — inclusive and Human Computer Interaction driven experiences by default.
- Expert in consumer products at scale: micro-interactions, motion design, Human–Computer Interaction, design systems and full product strategy.
- AI-forward: LLM interfaces (Claude, GPT), agentic AI workflows, MCP integrations, Cursor, FigJam AI.
- Mentor: Junior designers through critique, documentation standards and design thinking.

PROFESSIONAL EXPERIENCE

Cigna / Evernorth | Lead Senior UX Designer & Advisor 04/2022-11/2025

- Architected the LEAF Design System with 60+ reusable components, semantic tokens, Token Studio, CSS variables, supporting 10+ teams in large migrations.
- Owned LEAF multi brand Storybook, documenting components, UI patterns, accessibility and multi-brand token architecture.
- Led redesign of Benefit Overview, transforming a legacy text-heavy experience into a human centered, accessible modular UI that integrated member data to improve clarity, usability and reduce support dependency: Figma, FigJam, Adobe XD, Miro, HTML, CSS, JS.
- Replaced text-heavy healthcare UIs(Dashboard, Order, NewRx) with scannable, accessible card-based experience - reduced confusion and support calls.
- Designed and maintained the Evernorth public website - responsive, brand-consistent, optimized across all devices.

Express Scripts | Lead Product Designer 04/2016-03/2022

- Defined company-wide UI/UX strategy for MemberWeb (30+ products, millions of members) via CSS-injection - saved hundreds of eng. hours.
- Led and aligned a 10/12 person cross-functional team, driving human centered design standards and visual governance across multiple product teams.
- Owned full ParachuteRx lifecycle - research to HiFi to dev handoff - zero critical accessibility defects on launch: Figma, Figjam, Miro, Adobe XD, Html, CSS, JS
- Redesigned Pricing interface as a VoiceOver/NVDA-friendly experience for members with visual impairments.
- Modernised member dashboard with card layout, micro-interactions, and transitions.

Medco Health Solutions | Senior UI Designer 03/2009-03/2016

- Full product lifecycle UX - research, wireframing, HiFi, responsive dev, QA, and launches for millions of members- Figma, Adobe XD, HTML, CSS
- Translated regulated healthcare workflows into clean, accessible UI with clinical, engineering and compliance partners.
- Designed prescription management tools (refill, history, NewRx) reducing task abandonment.
- Shifted team to flexible, device-agnostic responsive patterns across the product portfolio.
- Presented design rationale to business and clinical leads, building alignment and accelerating decisions.

INTTRA Inc. | User Interface Designer 03/2006-10/2008

- Designed data-rich interfaces for global ocean trade: container tracking, booking, documentation for major shipping carriers.
- Transformed dense multi-step shipping workflows into clear, scannable UIs with intuitive form patterns.
- Ensured WCAG 2.1 AA compliance across all modules through structured accessibility testing.
- Turned complex data models into user-friendly dashboards, reducing training time.
- Produced detailed design specifications and interaction documentation that translated human centered design intent into scalable engineering implementation.

SELECTED PROJECTS & IMPACT

Design Leadership

- Mentored designers through critique, accessibility reviews, and documentation practices
- Facilitated cross-functional workshops aligning product, engineering, and accessibility teams
- Established design standards and governance across multiple product teams

Benefit Overview-Evernorth

- Redesigned legacy text-heavy UI into modular card-based experience
- Implemented WCAG 2.2 accessibility with VoiceOver/ NVDA testing
- Integrated member benefit data into a clearer personalized experience

LEAF Design System - Cigna

- Built 60+ components with token architecture & Storybook
- Adopted across 10+ product teams
- Reduced design-to-development handoff by ~40%
- Created guided documentation and video tutorials accelerating adoption
